

FRESHWATER PLACE BUILDING SIGN UPGRADE

After many discussions with Andrew Gowan Principal of Best Practice Lighting our preferred lighting specialist, lamenting the high annual costs of maintaining our static neon sign he delivered a proposal to upgrade the tired and dated neon to LED.

He did this by presenting the attached video (ledlighting.melbourne/led-signs) to demonstrate to the committee how the new sign could look. The video was met with great excitement by our committee members especially as they were able to program their own sequence, which can also be updated for various celebrations as required.

During the month of March, the new dynamic LED pixel sign was installed and is now soaring high over Southbank. Both the residents and I are thrilled and I especially looking forward to not having the annual bills to maintain it.

If you are looking to upgrade the façade of your building by replacing your old signage with a more dynamic LED option I highly recommend you call Andrew Gowan on 0409 858 947 or contact him by email andrewg@aghamel.com.au.

Kind regards
