The Essendon Football Club would be pleased to provide a testimonial for the works undertaken at Windy Hill.

We recently identified that the Windy Hill playing oval did not meet minimum lighting levels to train on.

Best Practices Lighting provided us an end to end service with a detailed lighting level report for the whole oval that was clear and easy to understand and offered us a number of solutions that would meet our current budget allowances and meet all our OHS obligations and would then allow training to resume along with the ability for future upgrades

The works were completed in a very timely manner.

Best Practices Lighting made themselves available at short notice for a number of site meetings.

This project was funded by 2 committees which both had different overall objectives. Best Practice Lighting took on all the feedback and provided a great outcome that met all our requirements.

I would not hesitate to recommend Best Practices lighting.

Regards

Alan Burton
